"MUSTS and MIGHTS" of Using Information from Sources:

Researchers must:
- Always make it clear where EACH PIECE of information (and image) came from (in a way that it can be easily located again).
- Always make it clear whether the words we present are OUR words or someone else's words.

Researchers might:
- Use MLA citations or just URL links (depending on the task and learning targets).
- Include a Works Cited list or bibliography.
- Use another citation style appropriate for our subject area.
